The Econometrics Of Panel Data

The aim of this volume is to provide a general overview of the econometrics of panel data, both from a theoretical and from an applied viewpoint. Since the pioneering papers by Kuh (1959), Mundlak (1961), Hoch (1962), and Balestra and Nerlove (1966), the pooling of cross section and time series data has become an increasingly popular way of quantifying economic relationships.

The Econometrics of Panel Data - Fundamentals and Recent ...

The Econometrics of Panel Data will be welcomed by econometricians and economists as a central reference point and guide to current thinking. The first volume features work on variance components model, its extensions and applications, estimation of variances, dynamic models, instrumental variable estimators and random coefficient models.

THE ECONOMETRICS OF PANEL DATA

Application to panel data regression Let ϵ_{it} be the error term of a panel data regression model, with $1 \leq i \leq n$, and $1 \leq t \leq T$. Three different specifications are common: 1. $\text{Var}(\epsilon_{it}) = \sigma^2$ and all covariances between error terms are zero. OLS can be applied (no weighting). 2. $\text{Var}(\epsilon_{it}) = \sigma^2 i$ and all covariances between error terms are zero.

Abstract: This is an intermediate level, Ph.D. course in the area of Applied Econometrics dealing with Panel Data. The range of topics covered in the course will span a large part of econometrics generally, though we are particularly interested in those techniques as they are adapted to the analysis of 'panel' or 'longitudinal' data sets.

Jakub Muck: Econometrics of Panel Data

In statistics and econometrics, panel data and longitudinal data are both multi-dimensional data involving measurements over time. Panel data is a subset of longitudinal data where observations are for the same subjects each time. Time series and cross-sectional data can be thought of as special cases of panel data that are in one dimension only (one panel member or individual for the former, one time point for the latter). A study that uses panel data is called a longitudinal study or panel stu
